

**LIST OF MILLS POTENTIALLY  
CONNECTED TO L'OREAL PALM-BASED OLEODERIVATIVES  
SUPPLY-CHAIN IN 2018**

*L'Oréal sources palm oil and palm kernel oil derivatives from surfactants or oleochemicals manufacturers. These manufacturers are themselves sourcing directly or indirectly from traders, primary and secondary refiners and crushing plants, which are potentially connected to thousands of mills on the ground. Every year, L'Oréal – via consultations with direct and indirect suppliers realized by an independent third party – conducts an in-depth investigation of its supply chain in order to map out L'Oréal's sourcing areas.*

*The list of the 1,355 mills disclosed below, results from the 2018 supply chain mapping work, and is representative of the singular complexity of the palm derivatives supply chains. These mills are located in 5 different countries, Indonesia (71%) and Malaysia (27%) being the main sourcing countries, followed by Thailand (1,5%), Papua New Guinea (<1%) and Cambodia (<1%). At province level, the mapping showed that L'Oréal volumes originate from 36 provinces, with top5 provinces being: Riau (15%), Central Kalimantan (11%), North Sumatra (11%), Sabah (9%) and East Kalimantan (6%).*

*The identification of the provenance of its sources provides L'Oréal with the basis for a preliminary risk assessment, field-level verification and most of all engagement with its direct and indirect suppliers towards ensuring compliance with L'Oréal's Zero Deforestation policy.*
