

**LIST OF MILLS POTENTIALLY CONNECTED TO L'ORÉAL'S  
PALM-BASED OLEODERIVATIVES SUPPLY CHAIN IN 2019**

*TOP 90% OF 2019 VOLUMES*

As a cosmetic manufacturer, L'Oréal uses annually less than 350 tons of palm oil each year (from the pulp of the palm fruit). L'Oréal also purchases palm derivatives, in a quantity equivalent to approximately 72,000 tons of palm oil and palm kernel oil (extracted from the kernel of the palm fruit), from its suppliers – surfactants and oleochemicals manufacturers. These manufacturers are themselves sourcing directly or indirectly from other manufacturers, traders, primary and secondary refiners and crushing plants, which are potentially connected to thousands of mills on the ground, which makes the palm derivatives supply chain singularly complex. Every year, L'Oréal – via consultations with direct and indirect suppliers realized by an independent third party – conducts an in-depth investigation of its supply chain in order to map out its sourcing areas.

The list of 970 mills disclosed below, potentially connected to L'Oréal's top 90% volumes of palm-based oleoderivatives, results from the 2019 supply chain mapping work. These mills are located in 3 different countries, Indonesia (77.4%) and Malaysia (22.3%) being the main sourcing areas, followed by Thailand (0.3%). At the province level, the mapping showed that L'Oréal's top 90% volumes originate from 33 provinces, with top 5 provinces being: Riau (19%), North Sumatra (16.5%), Jambi (11.6%), Sabah (9.3%) and Central Kalimantan (8.2%).

The identification of the provenance of our sources provides L'Oréal with the basis for a preliminary risk assessment, for field-level verification and most of all for engaging with its direct and indirect suppliers towards ensuring compliance with L'Oréal's Zero Deforestation policy in line with No Deforestation, No Peat, No Exploitation principles.

The complementary list of mills potentially connected to L'Oréal's remaining 10% of volumes is available [upon request](#). In total, it covers 810 mills located in 15 countries including Indonesia and Malaysia. More particularly, sourcing coming from Colombia, Papua New Guinea, Guatemala, Honduras, Costa Rica, Gabon, Cambodia, Solomon Islands, Cameroun, Brazil and Ivory Coast, each country representing less than 1% of L'Oréal's volumes of palm-based oleoderivatives in 2019. Those mills and sourcing origins have a much lower probability of being connected to L'Oréal's supply chain.

See details about our [supply chain mapping methodology](#).
