

**LIST OF MILLS POTENTIALLY CONNECTED TO L'ORÉAL'S
PALM-BASED OLEODERIVATIVES SUPPLY CHAIN IN 2021**

TOP 90% OF 2021 VOLUMES

As a cosmetic manufacturer, L'Oréal uses annually 310 tons of palm oil each year (from the pulp of the palm fruit). L'Oréal also purchases palm derivatives, in a quantity equivalent to approximately 88,500 tons of palm oil and palm kernel oil (extracted from the kernel of the palm fruit), from its suppliers – surfactants and oleochemicals manufacturers. These manufacturers source directly or indirectly from other manufacturers, traders, primary and secondary refiners and crushing plants, which are potentially connected to thousands of mills on the ground, which makes the palm derivatives supply chain singularly complex. Every year, L'Oréal – via consultations with direct and indirect suppliers carried out by an independent third party – conducts an in-depth investigation of its supply chain in order to map out its sourcing areas.

The list of 944 mills disclosed below, potentially connected to L'Oréal's top 90% volumes of palm-based oleoderivatives, results from the 2021 supply chain mapping work. These mills are located mainly in Indonesia (72.8%) and Malaysia (26.96%), which are the main sourcing areas, followed by Guatemala, Cambodia, Thailand, Papua New Guinea representing together 0.25%. At the province level, the mapping showed that L'Oréal's top 90% volumes originate from 42 provinces, with the top 5 provinces being: Jambi (18%), North Sumatra (16%), Riau (15%), Sabah (12%) and Peninsular (12%).

The identification of the provenance of our sources provides L'Oréal with the basis for a preliminary risk assessment, for field-level verification and most of all for engaging with its direct and indirect suppliers towards ensuring compliance with [L'Oréal's Forest Policy](#) in line with No Deforestation, No Peat, No Exploitation principles.

The complementary list of mills potentially connected to L'Oréal's remaining 10% of volumes is available [upon request](#). In total, it covers 1,979 mills located in 27 countries including Indonesia and Malaysia.

More particularly, we source from Colombia, Papua New Guinea, Thailand, Ghana, Ivory Coast, Honduras, Guatemala, Ecuador, Costa Rica, Brazil, Solomon Islands, India, Cambodia, Nigeria, Nicaragua, Panama, Liberia, Mexico, Uganda, Sri Lanka, Gabon, Philippines, Peru, Venezuela, and Cameroon, each country representing less than 0.5% of L'Oréal's volumes of palm-based oleoderivatives in 2021. Those mills and sourcing origins have a much lower probability of being connected to L'Oréal's supply chain.

[See details on our supply-chain mapping methodology](#)
