

Mars Simplified Supply Chain

Global Palm Oil Mill List

Mars is a member of the Roundtable on Sustainable Palm Oil (RSPO), a non-profit membership organization that promotes the growth and use of sustainable palm oil and since 2013, we have purchased 100% of our palm oil from RSPO-certified sources through the mass balance program.

In 2019, Mars introduced the Palm Positive Plan to transform the way we source palm oil. Since then, Mars radically simplified its supply chain to deliver deforestation-free palm oil in 2020. This progress has been made possible by significantly reducing the number of mills from which we source.

Our global palm oil supply chain is built to source from the select mills (listed on the following pages), which have been vetted to enable Mars to have 100% traceability to plantation. Additionally, the Universal Mill List identification numbers are now included so that the entire sector can consistently track and recognize our sources.
